If the entry in column 1 is less than the entry in column 2, write "0" in column 2.

If the "Highest Number Previously Paid For" (37 CFR 1.10(e)) is less than 20, enter "0".

If the "Highest Number Previously Paid For" (37 CFR 1.10(e)) is greater than or equal to 20, enter the "Highest Number Previously Paid For" (37 CFR 1.10(e)) in column 2.

The collection of additional fees required by 37 CFR 1.10(e) is based on the highest number previously paid for. This means that if there are multiple dependent claims, the highest number previously paid for is determined by adding together all the dependent claims and then dividing by the number of dependent claims. If there are multiple independent claims, the highest number previously paid for is determined by adding together all the independent claims and then dividing by the number of independent claims. If there are both independent and dependent claims, the highest number previously paid for is determined by adding together all the independent claims and then dividing by the number of independent claims.

This collection of additional fees required by 37 CFR 1.10(e) applies to independent claims, dependent claims, and multiple dependent claims. It does not apply to other types of claims, such as claims for reissues or claims for continuation-in-part applications.
